

ENVIRONMENT POLICY

Polaris Marine has been providing services to the maritime industry for over 30 years in sectors including offshore and inshore towage, marine construction support, salvages, vessel supply and manning whilst maintaining a well-established Environment Management System and high professional standards.

Polaris Marine aims to:

- Comply with all statutory obligations, standards, specifications relevant to the environment.
- Maintain, monitor, review, audit and continually improve the Environment Management System.
- Provide sufficient and suitable resources to implement and maintain the Environment Management System.
- Train our staff in environmentally sustainable practices.
- Establish, review and communicate performance measures and take action to improve environmental outcomes.
- Protect the environment, prevent pollution, minimise waste wherever practical, and promote recycling
- Review this policy every 2 years.

As the Managing Director of Polaris Marine Pty Ltd, I am personally committed to the development, implementation and improvement of the Polaris Marine Environment Management System and practices. Polaris Marine staff have the authority to take reasonable steps to protect the environment should an incident occur where they are working. Our Staff are also encouraged to inform Management if they are aware of any improvement that could be made to existing environmental practices.
